

[Asha Saxena](#) is the Founder and CEO of Women Leaders in Data and AI (WLDA), an exclusive mastermind group for women leaders in Data and AI, helping them succeed both personally and professionally. She is also a professor at Columbia University in NYC, teaching graduate students healthcare consulting and entrepreneurship, and is a partner with CEO International where she coaches CXO leaders.

As a serial entrepreneur, she has built and sold three successful businesses. Most recently, she has served as CEO and Chairperson of Future Technologies Inc., a data management firm that provided warehousing, analytics, and intelligence services. She was also the CEO and Chief Innovation Officer of ACULYST, which provided best-in-class healthcare analytics services through a pre-built model that integrates clinical, financial, and operational data. Asha has served on a number of for-profit and nonprofit boards and is a contributor and international speaker on a variety of technology, data, AI, and women-related issues.
